

Amendments to the Drawings:

The attached sheet of drawings includes changes to Fig. 12. This sheet, which includes Fig. 12, replaces the original sheet including Fig. 12.

Attachment: Replacement Sheet

REMARKS/ARGUMENTS

The foregoing amendment is being offered to correct typographical errors inadvertently filed with the application, and the information is to clarify and add numbers to Fig. 12, right side which are in the specification. These numbers should have appeared on Fig. 12 to show a close fit and locking or compression ring. The section which matches the replacement Fig. 12 reads "In another embodiment (see Fig. 12, right end), rotary target segments **54** are slid onto the backing tube **56**. The segment **54** abuts against a step or rim on the backing tube **56**. After the last segment **54** is placed upon backing tube **56**, a compression fitting **58** is disposed on the opposite end of the backing tube **56**, thereby securing the target segments **54** upon the backing tube **56**."

No new matter is presented by this Amendment. Entry of this amendment by the Examiner is respectfully requested.

Respectfully submitted,
